

Claims

1. A sweetening composition comprising:
 - (a) dextrose in an amount of about 60% - 90% dextrose by weight;
 - (b) maltodextrin in an amount of about 5% by weight;
 - (c) aspartame in an amount of about 4% by weight; and
 - (d) flavoring in an amount of about 1% - 31% by weight.
2. A sweetening composition according to claim 1 wherein the dextrose is an agglomerated dextrose.
3. A sweetening composition according to claim 1 wherein the flavoring is encapsulated.
4. A sweetening composition according to claim 3 wherein the flavoring is a spray dried powder.
5. A sweetening composition according to claim 1 wherein the flavoring is at least one of a group of flavors consisting cinnamon, peach, lemon, French vanilla, hazelnut, and mocha.
6. A sweetening composition according to claim 1 wherein the flavoring is a combination of flavors.

7. A sweetening composition according to claim 1 packed in one-gram packets.
8. A sweetening composition according to claim 1 packed in canisters.
9. A sweetening composition according to claim 1 packed in bulk.
10. A method for preparing a sweetening composition comprising:
 - (a) milling together dextrose and flavoring;
 - (b) preparing a dry blend of maltodextrin and aspartame with the milled dextrose and flavoring; and
 - (c) further milling the dry blend so that it is passable through a 30 mesh screen.
